

## Idiopathic Pulmonary Fibrosis Prospective Outcomes (IPF-PRO) Registry

**Status:** Recruiting

### Eligibility Criteria

**Sex:** Male or Female

**Age Group:** 18 years and over

This study is NOT accepting healthy volunteers

**Inclusion Criteria:**

- at least 30 years old - new diagnosis of Idiopathic Pulmonary Fibrosis (IPF) -diagnosis of a non-IPF Interstitial Lung Disease (ILD) of any duration, including, but not limited to Idiopathic Non-Specific Interstitial, Pneumonia (iNSIP), Unclassifiable Idiopathic Interstitial Pneumonias (IIPs), Interstitial Pneumonia with Autoimmune Features (IPAF), Autoimmune ILDs such as Rheumatoid Arthritis (RA-ILD) and Systemic Sclerosis (SSc-ILD), Chronic Hypersensitivity Pneumonitis (HP), Sarcoidosis or Exposure-related ILDs such as asbestosis

---

**Exclusion Criteria:**

- Cancer, treated or untreated, other than skin or early stage prostate cancer, within the past 5 years - currently waiting for lung transplantation - currently enrolled in a clinical trial

### Conditions & Interventions

**Conditions:**

Respiratory System

**Keywords:**

Clinics and Surgery Center (CSC), Idiopathic Pulmonary Fibrosis (IPF) Interstitial Lung Disease

### More Information

**Description:** Idiopathic Pulmonary Fibrosis Prospective Outcomes (IPF-PRO) Registry is a prospective registry that will collect information regarding the natural history, health care interactions, participant reported questionnaire data to assess quality of life of IPF participants, and the methods of treatment of participants with a diagnosis of idiopathic pulmonary fibrosis (IPF) established at the enrolling centers. In addition, blood samples will be collected and banked for future research projects.
