

MT2013-09C : Umbilical Cord Blood Transplantation Using a Myeloablative Preparative Regimen for the Treatment of Hematological Diseases

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: Not specified

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- up to 55 years old - see link to clinicaltrials.gov for inclusion criteria specific to each type of leukemia

Exclusion Criteria:

- Radiation Oncology will evaluate all patients who have had previous radiation therapy - pregnant or breastfeeding - HIV positive - study staff will review additional exclusion criteria

Conditions & Interventions

Conditions:

Cancer

Keywords:

Clinics and Surgery Center (CSC), Acute Lymphocytic Leukemia (ALL), Acute Myeloid Leukemia (AML), Chronic Myelogenous Leukemia

More Information

Description: This is a treatment protocol for an unrelated umbilical cord blood transplant (UCBT) using a myeloablative preparative regimen for the treatment of hematological diseases, including, but not limited to acute leukemias. There is no research element except the collection of routine clinical data.

Study Contact: Timothy Krepski - tkrepsk1@fairview.org

Principal Investigator: Margaret MacMillan, MD

Phase: NA

IRB Number: 1305M34181
