

MT2012-11C: Second or Greater Allogeneic Hematopoietic Stem Cell Transplant Using Reduced Intensity Conditioning (RIC)

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: Not specified

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- up to 55 years old - diagnosis of any disease for which a second or greater hematopoietic stem cell transplant (HSCT) is needed - see link to clinicaltrials.gov for complete inclusion and exclusion criteria

Exclusion Criteria:

- women who are pregnant or breastfeeding - active, uncontrolled infection - HIV positive

Conditions & Interventions

Conditions:

Blood Disorders

Keywords:

Hematologic Disorders, Hemoglobinopathies, HSCT, Immunodeficiencies, Stem Cell Transplant

More Information

Description: The primary purpose of this study is to record outcomes and patient characteristics in the Masonic Cancer Center and BMT databases for patients who are undergoing an allogeneic (donor) hematopoietic stem cell transplant. The data will be analyzed for transplant "milestones" such as time to blood count recovery (engraftment) and how patients are doing at 3 months and 6 months after the transplant. Participation in this study will not alter treatment or medical care. All information for this study will be collected from medical records.

Study Contact: Teresa Bekkala - tkivist1@fairview.org

Principal Investigator: Troy Lund

Phase: N/A

IRB

Number: 1207M17641
