

## MT2016-11 :Autologous Stem Cell Transplant In Patients with Hodgkin Lymphoma (HL) and Non-Hodgkin Lymphomas (NHL)

**Status:** Recruiting

### Eligibility Criteria

**Sex:** Male or Female

**Age Group:** Not specified

This study is NOT accepting healthy volunteers

#### Inclusion Criteria:

- up to 75 years of age - diagnosis of Hodgkin Lymphoma, Non-Hodgkin Lymphoma, Mature B cell Lymphoma, or Mature T cell Lymphoma - at least 4 weeks from previous chemotherapy; 6 weeks from nitrosoureas - women of child bearing potential and sexually active males with partners of child bearing potential must agree to use adequate birth control for the duration of treatment - see link to [clinicaltrials.gov](http://clinicaltrials.gov) for complete criteria

#### Exclusion Criteria:

- women who are pregnant or breastfeeding - chemotherapy resistant disease - unrelated active infection

### Conditions & Interventions

#### Interventions:

Drug: AraC, Drug: BCNU, Drug: Cyclophosphamide, Drug: Etoposide, Biological: G-CSF, Drug: Melphalan, Procedure: Peripheral blood stem cell transplantation, Radiation: Total Body Irradiation

#### Conditions:

Cancer

#### Keywords:

Clinics and Surgery Center (CSC), Hodgkin Lymphoma, Non-Hodgkin Lymphoma

### More Information

**Description:** The treatment (chemotherapy and transplant procedures) is considered standard clinical care that are usually given to the patients with this disease. The research aspect of this study is to collect data on the patients who are being treated on this plan. Patients will be followed throughout the course of their clinical care and for three years after their transplant.

**Study Contact:** Veronika Bachanova - [bach0173@umn.edu](mailto:bach0173@umn.edu)

**Principal Investigator:** Veronika Bachanova, MD

**Phase:** PHASE2

**IRB Number:** 1611M99805
