

SpHincterotomy for Acute Recurrent Pancreatitis (SHARP) Trial

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- at least 18 years old - two or more episodes of acute pancreatitis, with one occurring in the last 24 months - there is no certain explanation for recurrent acute pancreatitis

Exclusion Criteria:

- prior minor papilla therapy (endoscopic or surgical) - other causes of pancreatitis (study staff will review) - regular use of opioid medication for abdominal pain for the past three months

Conditions & Interventions

Conditions:

Digestive & Liver Health

Keywords:

Clinics and Surgery Center (CSC), ERCP, Pancreatitis

More Information

Description: We are studying the effectiveness of a new procedure to treat people who have episodes of acute pancreatitis with pancreas divisum. Of the participants, half will receive the new procedure called endoscopic retrograde cholangiopancreatography (ERCP) with minor papilla endoscopic spincterotomy (miES) the other half will receive only ERCP. We will monitor outcomes for at least eighteen months.
