

SLIP II Registry: Spinal Laminectomy Versus Instrumented Pedicle Screw Fusion

Status: Recruiting

Eligibility Criteria

Sex: All

Age: 18 Years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- Symptomatic lumbar spinal stenosis: defined as radicular and/or back pain either induced or aggravated by activity and relieved by rest.
- Single-level grade I degenerative spondylolisthesis (3-14mm)

Exclusion Criteria:

- Serious medical illness (ASA Class IV or higher)
- Spondylolysis
- Multilevel spondylolisthesis or high grade spondylolisthesis (grade II or greater than 14mm)

Conditions & Interventions

Interventions:

Other: Expert Panel Review

Conditions:

Lumbar Spondylolisthesis, Grade 1 Spondylolisthesis, Lumbar Spinal Stenosis, Degenerative Spondylolisthesis, Bone, Joint & Muscle

Keywords:

Lumbar Spondylolisthesis, Grade 1 Spondylolisthesis, Lumbar Spinal Stenosis, Degenerative Spondylolisthesis

More Information

Description: We aim to conduct a randomized control trial comparing patient outcomes and satisfaction with or without expert panel review before making a final decision about surgery for grade I degenerative lumbar spondylolisthesis. A prospective multi-center registry aimed at addressing important issues pertaining to outcomes from treatment for degenerative spondylolisthesis and spinal stenosis will be generated.
