

Post-operative Sore Throat and Gum Chewing for Long Duration LMA Use

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- having outpatient ambulatory surgery - receiving general anesthesia utilizing a laryngeal mask airway - surgery expected to last longer than 1 hour

Exclusion Criteria:

- chronic laryngitis - chronic bronchitis - asthma - gastroesophageal reflux disease - smoked within the last week - non-English speaking

Conditions & Interventions

Interventions:

Other: Control, Other: Gum

Conditions:

Breathing, Lung & Sleep Health

Keywords:

Clinics and Surgery Center (CSC), Anesthesia, Surgery

More Information

Description: The purpose of this study is to determine if chewing gum immediately prior to transport to the operating room reduces the severity of post-operative sore throat in patients who have an LMA placed for procedures with duration greater than 1 hour.
