

Diabetes RElated to Acute pancreatitis and its Mechanisms (DREAM)

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

1. diagnosis of acute pancreatitis no more than 90 days ago
-

Exclusion Criteria:

1. definite diagnosis of chronic pancreatitis based on results of scans (study staff will review) 2. pancreas tumors 3. prior surgery on the pancreas 4. pregnancy 5. other significant health problems, study staff will review

Conditions & Interventions

Conditions:

Diabetes & Endocrine, Digestive & Liver Health

Keywords:

Diabetes, Pancreatitis, Pancreas

More Information

Description: The purpose of this research study is to find out how many people with acute pancreatitis develop diabetes. Risk factors for diabetes and the types of diabetes that occur after acute pancreatitis will also be studied. A small number of people who already had diabetes before their acute pancreatitis attack will be enrolled for comparison.
