

Frailty Assessment by Edmonton Frail Scale to Predict Outcome in Patients Undergoing Cardiovascular Surgery "Frail Heart" Study

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

People who are having any of the following heart surgery procedures: 1. thoracic aortic surgery 2. coronary artery bypass graft surgery 3. Aortic valve replacement 4. Mitral valve replacement or repair 5. Tricuspid valve replacement or repair 6. Pulmonary valve replacement 7. Infective endocarditis surgery 8. Open and interventional abdominal aortic revascularization

Exclusion Criteria:

1. People who have liver cirrhosis 2. People who aren't able to make independent health care decisions

Conditions & Interventions

Conditions:

Heart & Vascular

Keywords:

Cardiac Surgery, Coronary Artery Bypass, Heart Valve Replacement, Abdominal Aortic Surgery

More Information

Description: We are looking at measures of frailty (including an assessment questionnaire and other data from the medical record) and the relationship to outcomes from cardiac or vascular surgery. The questionnaire will take about 10 minutes to complete and we will contact you by phone once every three months for one year after your surgery.
