

CONQUER Protocol Number 001: COllaborative, National QUality and Efficacy Registry for Tracking Disease Progression in Systemic Sclerosis (Scleroderma) Patients (CONQUER)

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Conditions & Interventions

Conditions:

Arthritis & Rheumatic Diseases

Keywords:

Clinics and Surgery Center (CSC)

More Information

Description: The purpose of this study is to develop a cohort of patients with early scleroderma, and to collect data on clinical outcomes, radiological tests, laboratory tests and to obtain biological specimens for testing. We hope to explore medical care and the impact of SSc on patients' daily lives through various questionnaires that will be collected during study participation. By looking at all of the areas mentioned, we hope to find out information about SSc that will help treat future patients, develop new treatments, and work towards a cure.
