

Accelerating Therapies for Refractory SJIA Patients

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: Up to 18 years old

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- at least 6 months old - new onset SJIA or established SJIA with or without lung and/or liver complications - parent or sibling of the enrolled child will also be asked to participate

Exclusion Criteria:

- illness sufficient to prohibit study participation - inability to cooperate with the study

Conditions & Interventions

Conditions:

Arthritis & Rheumatic Diseases, Rare Diseases

Keywords:

SJIA, Systemic Juvenile Idiopathic Arthritis

More Information

Description: This research study aims to learn more about the causes of Systemic Juvenile Idiopathic Arthritis (sJIA) including its complications such as Macrophage Activation Syndrome (MAS) and sJIA associated lung disease and identify new therapeutic targets. The study is asking for biological samples from those diagnosed with sJIA as well as their family members.
