

Personalized immunomodulation in pediatric sepsis-induced MODS (PRECISE)

Status: Recruiting

Eligibility Criteria

Conditions & Interventions

More Information

Description: This is a large-scale multi-center study of personalized, targeted immune modulation in children with sepsis-induced multiple organ dysfunction syndrome (MODS). This study is titled the "PeRsonalizEd immunomodulation in pediatriC sepsIS-inducEd MODS (PRECISE)". The study includes two concurrent, immunophenotype-driven placebo controlled randomized controlled trials (RCTs) that will address the central hypothesis that individualized, pathophysiology-specific immunomodulation will improve outcomes from sepsis-induced MODS in children
