

CORRECT-MRD II: Second Colorectal Cancer Clinical Validation Study to Predict Recurrence Using a Circulating Tumor DNA Assay to Detect Minimal Residual Disease

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

1. diagnosis of cancer of the colon or rectum (CRC) 2. complete surgical resection, with last surgery occurring within 180 days prior to enrollment

Exclusion Criteria:

1. started adjuvant (after surgery) therapy for current CRC diagnosis 2. women who are pregnant or breastfeeding 3. history of any invasive cancer except non-melanoma skin cancer

Conditions & Interventions

Interventions:

Device: MRD

Conditions:

Cancer

Keywords:

Colon Cancer, Colon Cancer, Colorectal Cancer

More Information

Description: We are enrolling people who have had complete surgical removal of a stage II or stage III colorectal cancer. We will draw blood samples for circulating tumor DNA (ctDNA) to find out if this blood test can be used to detect recurrence of the cancer. People will be followed for at least 3 years and up to 5 years.
