

Quantifying the Individual Heterogeneity of Presentation and Symptoms of Cognitive Impairment in Long COVID

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

1. able to speak English 2. have access to a compute with internet access 3. history of having COVID-19 4. continue to experience symptoms of long COVID-19 such as fatigue, "brain fog", trouble sleeping, headaches, etc.

Exclusion Criteria:

1. never tested positive for COVID-19

Conditions & Interventions

Conditions:

Brain & Nervous System, COVID-19

Keywords:

brain fog, COVID-19, fatigue, Long COVID-19

More Information

Description: This questionnaire and cognitive task study is being done to learn how different activities, like exercise, sleep, and stress, may affect symptoms of long COVID. We also want to know how symptoms may fluctuate over different times during the day and over several weeks. The study will take about 4 weeks to complete and will be done remotely.
