

Extracellular Vesicles as Potential Biomarkers and Therapeutic Target in Gaucher Disease

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over This study is also accepting healthy

volunteers

Inclusion Criteria:

- ages 18 to 80 - healthy volunteers without any known diagnosis

Exclusion Criteria:

- hematological cancer or other uncontrolled medical conditions

Conditions & Interventions

Conditions:

Rare Diseases

Keywords:

Gaucher Disease, Healthy Volunteers

More Information

Description: This is an observational study intended to generate preliminary data to understand how lysosomal dysfunction can affect the biogenesis of extracellular vesicles, its content and function. The study entails 2 visits over a 3-month period. On enrollment, participants will be scheduled for the 2 visits, during which fasting blood samples will be collected.
