

Liver Collection Study

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- Age 18 years or older - Undergoing abdominal surgical procedure with general anesthesia

Exclusion Criteria:

- Pregnancy or nursing - Physician may exclude

Conditions & Interventions

Conditions:

Diabetes & Endocrine, Digestive & Liver Health, Prevention & Wellness

Keywords:

abdominal surgery, liver biopsy

More Information

Description: This is a study of individuals older than 18, undergoing abdominal procedures in which the liver is accessible, and are amenable to liver samples being collected during their surgical procedure, with the option to participate in a specialized scan that can provide information on liver health, stiffness, and fat content. This study is trying to figure out how senescent (aging) cells in the liver are related to an individual's health status and better understand the association between these cells and different metabolic diseases.
