- Pacemaker - Allergy to adhesive tape - Planning to move away from the Minneapolis area in the next four years - Live in nursing home/long-term care facility - diagnosed with dementia or unable to consent for self

Conditions & Interventions

Conditions:

Diabetes & Endocrine, Heart & Vascular

Keywords:

aging, cognition, heart disease, Type 2 Diabetes, ARIC

More Information

Description: The purpose of the Atherosclerosis Risk in Communities (ARIC) Study - ARIC Generation 2 research study is to evaluate the link between glucose and heart problems in adults with type 2 diabetes. Heart problems can be common in people with type 2 diabetes. We are interested in measuring your blood sugar (glucose) using a continuous glucose monitor and monitoring your heart rhythm at the same time.
