

I-SPY 2 TRIAL -Investigation of Serial Studies to Predict your Therapeutic Response with Imaging and Molecular Analysis 2

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- invasive breast cancer confirmed by biopsy - tumor is at least 2.5 cm in size - no prior chemotherapy for this cancer - no restrictions in activity or partially restricted with work, but able to independently care for self - willing to have another breast biopsy - not pregnant or breast feeding - consult study staff for additional requirements

Exclusion Criteria:

- other medical or mental health diagnosis that would limit compliance with study requirements

Conditions & Interventions

Conditions:

Cancer

Keywords:

Breast Cancer, Breast Tumors, I-SPY, ISPY, ISPY2

More Information

Description: The I-SPY2 study uses 10 years of results to help your doctor understand more about your tumor and how to classify it better. This means your doctor will have more information and might be able to offer you a new treatment that could work better than the usual treatments. We need better treatments and better ways to identify which patients will benefit most from particular treatments.
