

## Developing and pilot testing an intervention to reduce household shisha smoke exposure within Somali homes

**Status:** Recruiting

### Eligibility Criteria

**Sex:** Male or Female

**Age Group:** Not specified

This study is also accepting healthy volunteers

**Inclusion Criteria:**

- families who identify as Somali American - have one or more children between 6 months and 18 years of age in the home - have at least one adult who uses shisha at home - families with other forms of tobacco use in addition to shisha use will be included

---

**Exclusion Criteria:**

- inability or unwillingness to complete all study procedures

### Conditions & Interventions

**Conditions:**

Cancer, Community Health

**Keywords:**

hookah, shisha, smoking

### More Information

**Description:** In this study, we want to find out more about secondhand smoke from shisha smoking in the home. We want to help families learn more about the risks of shisha smoke in the home and find ways to stop smoking at home.
