

Development of a RET-Specific Proteomic Assay from Circulating Tumor Cells in Lethal Prostate Cancer

Status: Recruiting

Eligibility Criteria

Sex: Male

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- diagnosis of metastatic castration resistant prostate cancer receiving a standard-of-care systemic therapy (e.g. abiraterone acetate, enzalutamide, darolutamide, or chemotherapy).

Exclusion Criteria:

- known HIV positivity and/or active Hepatitis B based on medical history

Conditions & Interventions

Conditions:

Cancer

Keywords:

Clinics and Surgery Center (CSC), MCRPC, metastatic castration resistant prostate cancer

More Information

Description: The goal of this study is to find a special protein in the blood of individuals with serious prostate cancer. Special tests look for this protein in their blood while they are getting their regular cancer treatments.
