

ASSESS ALL ALS Study

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is also accepting healthy volunteers

Inclusion Criteria:

- diagnosis of Amyotrophic Lateral Sclerosis (ALS) by a physician - access to a smartphone, computer or tablet, and internet (need not be in the home
- access to a public library or other available computer with internet connection is sufficient - for HEALTHY participants: no diagnosis of ALS , Progressive Muscular Atrophy (PMA) or Primary Lateral Sclerosis (PLS), no family history ALS/Frontotemporal Dementia (FTD) in a close family member** unless the participant has previously tested negative for the known causative ALS genes, and access to a smartphone, computer or tablet, and internet (need not be in the home
- access to a public library or other available computer with internet connection is sufficient - see link to clinicaltrials.gov

Exclusion Criteria:

- cognitive impairment, clinical dementia, or unstable psychiatric illness, including psychosis, active suicidal ideation, suicide attempt, or untreated major depression <= 90 days of starting the study, - clinically significant unstable medical condition

Conditions & Interventions

Conditions:

Brain & Nervous System, Rare Diseases

Keywords:

ALS, Amyotrophic Lateral Sclerosis, Clinics and Surgery Center (CSC)

More Information

Description: We are doing this research to collect a wide range of samples, clinical information, and measurements that will be used for future research into ALS and related neurological diseases. Participants will be asked to complete 7 in-person study visits and monthly remote self-assessment activities. Access to a personal device (computer and/or smartphone or tablet) that is connected to the internet is needed to complete the monthly remote activities.
