Age Group: Not specified

This study is also accepting healthy volunteers

Inclusion Criteria:

- MN and WI residents - age 16 and up - English speaking

Conditions & Interventions

Conditions:

Infectious Diseases, Prevention & Wellness, Community Health

Keywords:

climate change, Lyme disease, vector-borne disease

More Information

Description: You are invited to take part in a survey to help us learn more about what people know and think about diseases that are spread by ticks and mosquitoes.

This study is being conducted by the researchers at the University of Minnesota Medical School on the Duluth Campus. The goal is to understand how people feel about these diseases and how much they know about how to protect themselves.
