

A Phase 1/2 Study of FOG-001 in Participants with Locally Advanced or Metastatic Solid Tumors (FOG-001-101)

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- locally advanced or metastatic solid tumor - may not be able to do physically strenuous activity but walking and able to carry out work of a light or sedentary nature, e.g., light house work, office work - see link to clinicaltrials.gov for specific requirements by type of tumor

Exclusion Criteria:

- history of bone metastasis except patients with mCRPC - Osteoporosis - uncontrolled inflammatory bowel disease (i.e., ulcerative colitis or Crohn's disease) - women who are pregnant, breastfeeding, or planning to become pregnant - see link to clinicaltrials.gov for complete Exclusion criteria

Conditions & Interventions

Conditions:

Cancer

Keywords:

cancer, metastatic cancer, Clinics and Surgery Center (CSC), solid tumor

More Information

Description: This study is for people who have been diagnosed with cancer that is advanced (means disease has spread from the original site or has come back) or is metastatic (means the disease has spread to other parts of the body). FOG-001 is currently being developed to treat people with cancer. We want to see how safe and tolerable FOG-001 is when given alone and together with other anticancer drugs at different dose levels in participants. We also want to see how FOG-001 affects the body and the cancer
