

Molecular MRI Biomarkers in Parkinson's Disease

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is also accepting healthy volunteers

Inclusion Criteria:

- 40-80 years of age - diagnosed with Parkinson's disease (PD) - willingness to undergo brain MRI

Exclusion Criteria:

- diagnosed with dementia - have a severe tremor - have a neurological disorder or condition other than Parkinson's disease - pregnant or planning to become pregnant during the study - foreign objects or metal in the body that would prevent MRI participation

Conditions & Interventions

Conditions:

Brain & Nervous System

Keywords:

Clinics and Surgery Center (CSC), Parkinson's, Parkinson's Disease

More Information

Description: This study uses an advanced MRI scan to better understand how the brain produces and uses energy in people with Parkinson's disease (PD). What we learn may improve our understanding of PD and help guide future treatments.
