

Pediatric 3D Scanned Images Database

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: Up to 18 years old

This study is also accepting healthy volunteers

Inclusion Criteria:

- infants, children, and adolescents from 35 weeks gestational age to under 18 years old who are receiving care in the hospital or participating at the State Fair Research Building at the Minnesota State Fair

Exclusion Criteria:

- individuals who are too medically unstable to participate or require a breathing tube through the mouth

Conditions & Interventions

Conditions:

Breathing, Lung & Sleep Health, Children's Health, Ear, Nose & Throat

Keywords:

3D Scan, BiPAP, CPAP, Database, Medical Device, MNFair

More Information

Description: The purpose of this study is to collect 3D measurements of children's faces, heads, hands, and feet using a safe, non-invasive 3D scanner. These measurements will help researchers design and improve medical devices that better fit children's unique needs.
