

Interpreting mmWave Radar Data for Decision-Making in Simulated

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is also accepting healthy volunteers

Inclusion Criteria:

- adults aged 18 years or older - have overdose-response education or training

Conditions & Interventions

Keywords:

community intervention, naloxone, Narcan, overdose education, overdose response

More Information

Description: The purpose of this study is to learn how people interpret breathing information displayed during simulated overdose emergencies. Participants will review breathing data, answer questions, and share feedback to help researchers design clearer and more effective tools for emergency response.
