

Phase 2b Multicentre, Randomized, Double-Blind, Placebo-Controlled, Parallel Group Dose-Ranging Study to Assess the Efficacy, Safety, and Tolerability of AZD2373 in Participants with APOL1-Mediated Kidney Disease (APPRECIATE)

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is NOT accepting healthy volunteers

Inclusion Criteria:

- 18 to 70 years old - of African descent, including Black, African American, Afro-Caribbean, Afro-Latino, West African, or other African diaspora heritage - have a high-risk APOL1 genetic type (G1/G1, G1/G2, or G2/G2) - diagnosis of kidney disease with increased protein in the urine and reduced kidney function - see link to clinicaltrials.gov for complete inclusion criteria

Exclusion Criteria:

- body Mass Index (BMI) greater than 45 kg/m² - diagnosis of type 1 diabetes or certain concerns related to type 2 diabetes, serious heart conditions, high blood pressure, abnormal heart test results, certain types of kidney disease not related to APOL1, or a bleeding disorder - receiving dialysis or have had a kidney or other organ transplant - see link to clinicaltrials.gov for complete exclusion criteria

Conditions & Interventions

Interventions:

Device: APOL1 Genotyping Clinical Trial Assay, Combination Product: AZD2373-Arm 1, Combination Product: AZD2373-Arm 2, Combination Product: Placebo

Conditions:

Kidney, Prostate & Urinary, Rare Diseases

Keywords:

APOL1, Clinics and Surgery Center (CSC), AMKD, AZD2373, Kidney, Kidney Disease, Kidneys

More Information

Description: This study is for adults with APOL1-Mediated Kidney Disease (AMKD). Researchers are testing a study medicine called AZD2373 to learn if it may help treat this type of kidney disease and how safe it is to take.
