Sex: Male or Female

Age Group: Up to 18 years old

This study is also accepting healthy volunteers

Inclusion Criteria:

- ages 2-12 years old

Exclusion Criteria:

- musculoskeletal, neurological, or neuromuscular conditions affecting upper limb strength or function - diagnosis of a systemic condition affecting the musculoskeletal or nervous system - previous hand, wrist, or upper limb surgery - history of hand, wrist, or upper limb trauma - current pain in either hand or upper limb

Conditions & Interventions

Conditions:

Arthritis & Rheumatic Diseases, Bone, Joint & Muscle, Brain & Nervous System

Keywords:

Grip strength, hand function, MNFair

More Information

Description: How strong is your squeeze? We're inviting kids aged 2-12 to test their grip and help us establish new standards for hand strength. Your contribution allows our team to create more inclusive, accurately calibrated technology that works for everybody. Stop by the Minnesota State Fair Research Building for a Tyrannosaurus Flex to help us find the Fair-ly Normal Grip and help us build the future of interactive play!
