

D2D: Establishing normative range of motion for scapular protraction and retraction among a healthy adult population

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is also accepting healthy volunteers

Inclusion Criteria:

- ages 18 years or older - no known injury/pathology that would impair movement of the scapula

Conditions & Interventions

Conditions:

Arthritis & Rheumatic Diseases, Bone, Joint & Muscle, Brain & Nervous System

Keywords:

measurement, normative values, reference values, rehabilitation, Shoulder, MNFair

More Information

Description: Help researchers at the Minnesota State Fair Research Building understand normal shoulder blade movement by participating in a 10–15 minute motion assessment.
