- history of certain serious neurological conditions, such as stroke, multiple sclerosis, severe brain injury, or dementia - severe heart disease or other serious organ-related conditions - currently receiving chemotherapy or radiation treatment for cancer - certain severe mental health conditions, such as schizophrenia or bipolar disorder

Conditions & Interventions

Keywords:

Cognitive functioning, generations, MNFair

More Information

Description: The UMN Neuropsychology team invites you to the Minnesota State Fair Research Building to complete a brief health survey and a couple of quick cognitive tests to help us learn how different generations, from Silent and Boomers to Millennials and Gen Z, complete two executive functioning tasks.
