

Prospective cohort study to describe the natural history of Epstein-Barr virus infection

Status: Recruiting

Eligibility Criteria

Sex: Male or Female

Age Group: 18 years and over

This study is also accepting healthy volunteers

Inclusion Criteria:

- ages 18-20 - first-year college or university student

Exclusion Criteria:

- taking immune suppressing medication - known immune system disorder

Conditions & Interventions

Conditions:

Community Health, Infectious Diseases, Prevention & Wellness

Keywords:

college, EBV, Epstein-Barr, observational, student, Young adult

More Information

Description: This study is following first-year university students to learn more about Epstein-Barr virus (EBV) infection. We want to learn more about how common EBV is, how often new infections occur, and what factors may be linked to infections. The results may help us plan future EBV studies.
